On February 29, students of Y6G at Singapore International School, Vung Tau had the opportunity to participate in a global classroom with 7 Vietnamese schools from North to South and 2 international schools (from Russia and Indonesia) through Zoom. After nearly two hours, the global class took everyone on a journey to travel, explore, and experience local and traditional dishes of three countries: Indonesia, Russia and Vietnam. Emotions mixed with happiness when for the first time 09 domestic and foreign schools connected and studied together. A class is considered "very hungry" but filled with joy.

🇻🇳 07 schools in Vietnam (03 regions North - Central - South)

2G's Journey to Confidence: Learning "Where do they Live?"

In the heart of our English class, 2G embarked on an exciting journey of exploration and self-expression through the enchanting poem, "Where do they Live?". Each student delved into the verses, embracing the rhythm and meaning, as they committed the words to memory.

With dedication and enthusiasm, they took turns stepping into the spotlight, bravely reciting the poem individually before their peers. This exercise not only honed their memorization skills but also fostered a supportive environment where each student could shine. The class became both audience and adjudicator, offering constructive feedback and encouragement, nurturing a spirit of camaraderie and growth.

As the days unfolded, so did their confidence. With each recitation, they strived to embody the essence of confident communication, standing tall and speaking with clarity and conviction. It was a testament to their determination and perseverance.

The culmination of their efforts was a remarkable moment of unity and harmony. With synchronized voices and unwavering confidence, the entire class stood shoulder to shoulder at the front of the room, reciting the poem together without glancing at the words. It was a fluent and mesmerizing performance, showcasing not only their mastery of the poem but also their collective spirit and synergy as a class.

In that moment, they were all winners, celebrated not for individual achievement but for the courage, resilience, and unity they displayed. Each student had given their very best, and together, they had achieved something truly extraordinary.

As their English teacher, I couldn't be prouder of 2G. Their journey with "Where do they Live?" not only enriched their understanding of poetry but also empowered them to embrace challenges, support one another, and strive for excellence in all they do. Here's to many more moments of shared triumph and growth in the days ahead.

Results of Violympics Math Competition

In the 2023 - 2024 school year, Singapore Vietnam International School received many impressive achievements at the Vietnamese Math Violympic, Vietnamese and English Math competitions at the school level. The results they achieved were as follows:

Year 6G Science: It's all about Happiness, Health, Forgiveness and Dreams in the New Year

If you thought that science is all about test-tubes and chemicals, you would better think again.

Science is also about the New Year and its implications, well, according to Vietnamese culture. Recently, Year 6G at Singapore International School, Vung Tau had a seed germination activity in the laboratory. The students planted seeds in tandem with Vietnamese New Year cultural values. They planted seeds of happiness, good health, forgiveness and dreams.

Next time you have seeds, never mind. Just bring them to our laboratory and we will turn them into your blessings and dreams.

MATHS SHOP FUN!

Greetings, Math Enthusiasts!

In Year 2 International's latest hands-on activity, students embarked on an exciting journey into the world of commerce with our very own Maths Shop simulation! Here's a quick rundown of the adventure:

1. **Setting Up Shop:** Students collaborated in groups to design and price their very own toys, unleashing their creativity as they brought their drawings to life!

2. **Shopkeeper Shuffle:** One brave soul took on the role of the shopkeeper, while the others eagerly donned their customer caps, ready to embark on a shopping spree.

3. **Spend Wisely:** Armed with \$100 in Singaporean currency in the form of notes and coins of various denominations, each customer scoured the shop for their favorite toys, strategizing how to make the most of their budget. But remember, no customer could purchase more than two toys!

4. **Making Change:** As the customers made their purchases, the shopkeeper sprang into action, ensuring that each transaction was smooth and accurate, doling out the correct change with precision.

5. **Role Reversal:** With each round, students swapped roles, taking turns to be both the savvy shopkeeper and the discerning customer, honing their mathematical skills and fostering teamwork along the way.

What a whirlwind of mathematical marvels and imaginative play! Stay tuned for more adventures in learning as we continue to explore the endless wonders of mathematics together.

Happy calculating,

Year 2 International Maths Team

Through this engaging Maths Shop activity, students not only honed their mathematical skills but also developed crucial real-world understanding. By setting up their own toy shop, determining prices, and handling transactions, they gained practical experience in basic arithmetic, money management, and problem-solving. Moreover, taking turns as both shopkeeper and customer fostered collaboration, communication, and critical thinking. Overall, this hands-on approach not only made learning enjoyable but also equipped students with valuable life skills they can apply beyond the classroom.

Women's Day

Every March, blending in with the beautiful spring colors, Vietnam celebrates its traditional holiday honoring women, known as Vietnamese women's Day which is also celebrated by all women around the world. This is a day to honor the beauty of Vietnamese women and is also an opportunity for us to express our gratitude and love for our grandmothers, mothers, sisters, aunts.

The students of class 4G expressed their deep love for their mothers and teachers through unique wooden cards. The colors of each panel also have different styles. Many postcards have hot, energetic colors such as pink, orange, red... there are also some that are a harmonious combination of dark colors such as black, brown, indigo blue.

Wooden cards not only demonstrate aesthetic talent and encourage maximum creativity in each student, but are also a way to express their sincere feelings towards their beloved mothers and teachers like me.

Beach Clean-Up Drive

Singapore International School Organizes Vung Tau Beach Clean-Up Drive on March 2, 2024.

Despite the sweltering heat, students, parents, and teachers from Singapore International School (SIS) came together on March 2nd, 2024, for a beach clean-up drive at the Vung Tau front beach. The event began at 8:30 AM. Although the high tide gave the illusion of a clean beach, participants exhibited unwavering dedication in collecting trash while enjoying some playtime on the sand.

The initiative highlighted the school's commitment to environmental stewardship and the community's collaborative efforts towards a cleaner and healthier environment. This beach clean-up drive is part of an ongoing initiative launched by SIS last year. The school remains committed to instilling a sense of environmental responsibility in its students and fostering community involvement for a sustainable future.
